

Chemical Spill Response

The Chemical Spill Response Guidebook is available from EH&S and provides instruction for containing, controlling, and cleaning up incidental chemical spills. Assistance is also available from EH&S personnel.

Chemical Spill Control Kits are available free from EH&S. These kits consist of a one gallon container of universal spill absorbent (1:1, sodium bicarbonate and clay), a plastic duct pan and broom, a Spill Response Guidebook, in a labeled 5-gallon bucket which can be used to contain the spilled material, broken glass, and contaminated absorbents.

Laboratory Safety Checklist

Please refer to the following checklist and ensure that all of the following training requirements, documentation, and safety equipment are present and working properly.

Administrative Requirements:

- Chemical Hygiene Training
- Laboratory Chemical Safety Plan (LCSP)
- Material Safety Data Sheets
- Chemical Spill Response Guide
- Hazardous Waste Management Guide
- Emergency Contacts & Phone Numbers Posted

Safety Equipment:

- Fire Alarm
- Fire Extinguisher(s)
- First Aid Kit
- Safety Shower
- Emergency Eyewash
- Chemical Spill Control Kit
- Personal Protective Equipment

INDIANA UNIVERSITY

Chemical Safety Program

The Laboratory Safety Compliance Committee (LSCC) welcomes you to Indiana University! To help you achieve your research goals an abundance of services are available that will help make your research safe and efficient. The LSCC website can be found at www.lsc.indiana.edu and questions may be sent to lsc@indiana.edu.

The University Office of Environmental, Health, and Safety Management (EH&S) manages the Chemical Safety and Hazardous Waste Programs for Indiana University.

The mission of the Chemical Safety Program is to promote high quality laboratory chemical safety and to ensure regulatory compliance for all uses and disposal of laboratory chemicals.
