

NOTICE

Laboratory Glove Use And Movement of Materials in Corridors

- Use of disposable gloves must be restricted to the laboratories. Please insure that lab workers using disposable gloves do NOT touch door knobs, telephones, etc. while wearing disposable gloves.
- When transporting materials into the corridors remove gloves before entering the hallway and re-glove upon arrival at the new location. Exceptions (i.e. handling sterile items or frozen materials) must be approved by the Principal Investigator.
- All containers must be closed in the corridor. If containers do not have lids they must be covered with plastic wrap, foil, parafilm or some other compatible material. If the plastic wrap or covering will leak the containers must be transported in a sealed secondary container.
